- 3-motorized + Lifter

Modular system

Relax chair mechanism Bonn Power

The relax chair mechanism Bonn Power is loadable up to 160 kg and is therefore a special high-performance version of model Bonn. The advantage of compact mechanism is kept despite higher loadability. So seatwidth of this model is only slightly wider than the one of classical Bonn mechanism.

All relax chair mechanisms Bonn Power basically offer the following characteristics:

- seat depth and back height adjustable several times
- seat width and seat form choosable
- seat height choosable due to swivels with various heights
- many designs possible due to optional adapters and attachments
- can be combined with all heavy duty swivels and foot bases of our product range

We offer you the relax chair mechanism Bonn Power in following variants:

Bonn Power manual

Specifications:

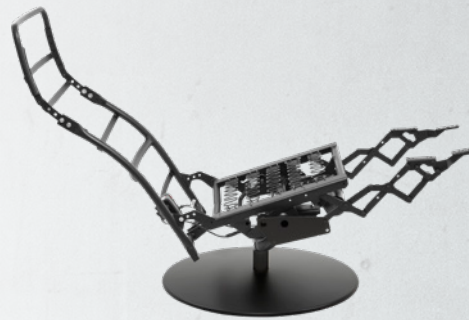

- back adjustment by gas spring with high-quality stainless steel trigger lever
- manual head rest adjustment
- larger seat width of 518 mm
